1,980 Eggs Have Arrived!

On Tuesday, 1,980 eggs arrived at Prince William 4-H Headquarters just in time for our egg pickup tonight! Please bring a container (egg carton) to transport your eggs safely home. Your incubators should be up and running and set to 99.5°F and 50% humidity.

There are two opportunities for egg pickup, both at 8033 Ashton Ave., #105, Manassas:

- February 21st (today) from Noon-6 PM (earlier hours added)
- February 22nd from 9 AM - 12 PM

As you can tell by these cuties on the left - our test project chicks hatched on Monday! We had 11 eggs in the incubator and 6 produced viable chicks. We're enjoying all of the commotion and cuddles in the office. They will be rehomed at the end of the week to a local 4-H family's coop. Be sure to peek in when you pick up your eggs!

SHIMMER

Hey kids, thanks for adopting my calf, Shimmer!

Utah

Utah has an important job on the farm which is to continue producing delicious and healthy milk each day for all of us to enjoy!

In order for Utah to continue producing milk, she will become pregnant and give birth to another calf in about one year.

Utah will be pregnant for 9 months. The first 7 months she will continue living with the herd, and the last 2 months, she will go on a vacation like a maternity leave. During this time, she does not produce milk and focuses her energy on growing a healthy calf.

Patricia's Update

Have you been charting Shimmer's growth? Pretty soon she'll be a full grown cow like her mother, Utah. You can download a free growth chart on our PW 4-H Shimmer Google Drive (see below). Check out this idea from Discover Dairy:
